CONTRACT CASES AND MATERIALS EDITIONS

Contract Cases and Materials is a comprehensive casebook that provides an essential introduction to contract law. The 11th edition includes new cases and materials that reflect recent developments in the field. The book also features a new chapter on the law of contracts, written by leading scholars in the field. The 11th edition is available in an e-book format, which allows for easy access and flexibility in the classroom. It also includes a companion website with additional resources for students and instructors. The book is designed to be used in a variety of courses, including introductory contract law, advanced contract law, and specialized courses in areas such as corporate law and commercial transactions. The authors have carefully selected cases that illustrate key concepts and principles, and they have provided a wealth of teaching aids to help instructors effectively engage students in the study of contract law. With its clear and concise writing style, comprehensive selection of cases and materials, and rich array of pedagogical features, Contract Cases and Materials is an invaluable resource for students and instructors alike.
Cases, Materials and Text on Contract Law

Hugh Brooks, 2019

This is the third edition of the widely acclaimed and successful casebook on contract in the Ius Commune series, developed to be used throughout Europe and learned by anyone who teaches, learns or practices law with a comparative or European perspective. The book contains leading cases, legislatives and other materials from English, French and German law as the main representatives of the legal traditions within Europe, as well as EU regulations and case-law and material from the Principles of European Contract Law. The materials also make use of other international instruments such as the Vienna Sales Convention, the Principles of International Commercial Contracts and the United Nations Convention on Contracts for the International Sale of Goods. The materials are chosen to put the main topics into context, to provide students with a better understanding of the law and to make them more comparative.

The third edition includes many new developments at the EU level (including the ill-fated proposal for a Common European Sales Law and further developments linked to the digital single market) and at national level, in particular the major reform of the French Code Civil in 2016 and 2018. The book is designed not to overwhelm students by its length but covers all aspects of the law of contract most commonly found in the undergraduate curriculum.
